SUMMARY
Innovative and motivated front-end web developer. Excels in deliberate decision-making and clear communication. Passionate about constantly figuring out new technologies and finding creative ways to solve problems.

EXPERIENCE
Software Engineer Intern
Emile Learning | Feb. 2021 to Apr. 2021
- Developed various features and web components for Emile's website/platform using **React, ChakraUI, Next.js, TypeScript, Firebase, Prismic,** and **ReactQuery**, improving product quality
- Collaborated with product owners, designers, and engineering team using **Figma, ClickUp,** and **Vercel**

Technology Intern
Kim Center for Social Balance | Feb. 2020 to Dec. 2020
- Designed and styled **WordPress** website layouts, improving user experience and visual appeal of a website for a nonprofit that aims to promote equal status for all genders in the workplace and communities

Web Development Intern
Q-Centrix | Aug. 2019 to Oct. 2019
- Contributed to test suite, writing validation specs using **Capybara, RSpec,** and **Selenium** for digital hospital forms, resulting in greater test coverage and higher confidence in form functionality
- Debugged existing codebase written in **Ruby** upon discovering issues, improving software performance
- Collaborated with existing development team via code reviews, Agile standups, sprints, Circle CI/CD

PROJECTS
Pomodoro Timer
- Programmed a Pomodoro countdown timer using **React.js, JavaScript, HTML,** and **CSS** to create an engaging time-management system to manage schedule and create efficient work habits
- Built a simple to-do list with basic CRUD operations with **Django-Rest-Framework, Python** to track tasks

ThoughtFull: Daily Reflection | Heroku
- Designed a blog site to encourage thoughtfulness in everyday life using **JavaScript/React.js** and **Bootstrap** for the frontend and **Ruby on Rails** to store and serve posts depending on user authentication status
- Incorporated and modified the **Leaflet API** to display geographical location of post

Fish Tinder
- Built a **JavaScript/React.js** single-page application that sends data to backend via **Rails API**
- **Ruby on Rails** backend with CRUD operations performed on data from frontend form responses

EDUCATION
Full Stack Web Development Program | LEARN Academy | 2019
- Experienced 480+ hours of direct coding training with **HTML, CSS, JavaScript (ES6), React.js, Ruby, Ruby on Rails,** and **PostgreSQL** to build full-stack web applications

University of California, San Diego | 2012 to 2016
B.S. in Human Biology, minor in Psychology
